Diagnosing What Your Eyes Don't See

With Dr. Lon McRae

As Clinicians, our primary objective is to make a correct diagnosis and treatment plan for our patients. This course will demonstrate some unique approaches on how to examine, diagnose and communicate suggested treatment to maximize the care that we provide. Understanding what is vital and what is hype and how to implement easy protocols for the entire team can be a game changer for many practices. This course will educate the entire dental team on how to improve and find greater success with treatment plan acceptance.

Course Objectives:

- FaceTime – facial recognition of airway problems.
- Nose breathing vs mouth breathing.
- How to do a two-minute airway assessment with every patient.
- Airway and occlusion – how do these work together for correct diagnosis?
- What is new with dental implants in the aesthetic zone.
- Tongue tie identification and treatment from infant to adult.
- Provide step-by-step procedures for best clinical outcomes.
- Involving the entire dental team to improve ROI and patient acceptance.
- Incorporating technology as a diagnostic tool and understanding what to invest in.
