

GET YOUR HANDS ON THE FUTURE OF DENTISTRY

*Next-Generation PRF & Laser Protocols
for Dental, Sleep, and Facial Aesthetics*

COURSE 1

COURSE DESCRIPTION: This course aims to highlight the recent advancements made concerning the newest protocols of platelet concentrates and laser therapy including recent developments in horizontal centrifugation, liquid concentrated-PRF, and DEKA Dental Laser Applications to further speed wound healing and tissue regeneration for various clinical indications faced in dental, sleep, and facial aesthetics.

COURSE OBJECTIVES:

- Provide the biological background and scientific rationale for why platelet concentrates speed wound healing
- Introduce new protocols using horizontal centrifugation
- Provide clinical indications of when, where, and why to use PRF
- Introduce DEKA Dental Lasers Facial Aesthetic Applications
- Hands-On experience with BioRefresh Protocol

COURSE 2

COURSE DESCRIPTION: This course will highlight CO₂ laser therapy for soft tissue surgical and non-surgical therapy along with oropharyngeal fractional ablation for the improvement of the airway. The course will cover clinical indication and application, patient selection, and business development.

COURSE OBJECTIVES:

- Introduce fractional ablation applications
- Explain clinical techniques available for soft palate therapy
- Understand patient selection and multi-modality therapy in sleep dentistry
- Understand Laser Tissue Interaction
- Hands-On experience with the QuietNite protocol
